Replies need checking

# Textbook help on the phone — from the book, on the device.

## THE SHORT VERSION

|                      |                                                                                               |
|----------------------|-----------------------------------------------------------------------------------------------|
| FOR                  | Maharashtra State Board students, Std 5–10, their parents and schools                         |
| WHO STRUGGLE WITH    | getting unstuck when no adult, tutor or connection is around                                  |
| VIDYA AI IS          | an offline Android study companion for supported textbooks                                    |
| THAT HELPS           | a student type a question and get an answer from the book on the phone                        |
| UNLIKE               | broad online AI chat or paid tuition hours                                                    |
| IT DIFFERENTIATES BY | running locally with no internet permission in the standard app, and showing what it searched |

## THREE WAYS TO READ THIS BROCHURE

🕒 10 SECONDS

### The one-line version

Offline phone study help for supported State Board textbooks.

[Summary →](#)

🕒 2-5 MINUTES

### How it works

The mechanism, the demo and how to try it.

[How it works →](#)

🕒 10-20 MINUTES

### The full picture

Plus proof status, offer, trust and FAQ.

[Start at the beginning →](#)

#### PLATFORM

Android phone

#### COVERAGE

Supported books, Std 5–10

#### CONNECTIVITY

Standard app has no internet permission

#### ACCESS

Arranged directly

# The question does not wait for the next class.

A chapter can make sense in the classroom and still raise questions at home. A parent may be busy. A teacher may be unavailable. An online explanation may need a connection.

*The student needs another place to begin exploring the doubt.*

After school

At home

During revision

# Ask. Find. Explain. Check.

01

## Install

**INSTALL APP AND SUPPORTED CONTENT**

Set up the app, AI files and supported book content.

**SETUP DEPENDENCY · BEFORE STEP 02**

Standard setup transfers the app and content by USB.

02

## Ask

**ASK A TYPED QUESTION**

Type a question about an included textbook.

Search can choose the wrong section. A source label shows search context; it does not certify the answer.

03

## Find

**FIND BOOK PASSAGES LOCALLY**

Local search selects relevant book passages.

04

## Explain

**GENERATE A REPLY LOCALLY**

AI on the phone drafts a reply.

05

## Check

**CHECK SOURCE CONTEXT AND TEXTBOOK**

Read the source-section label and compare important points with the textbook.

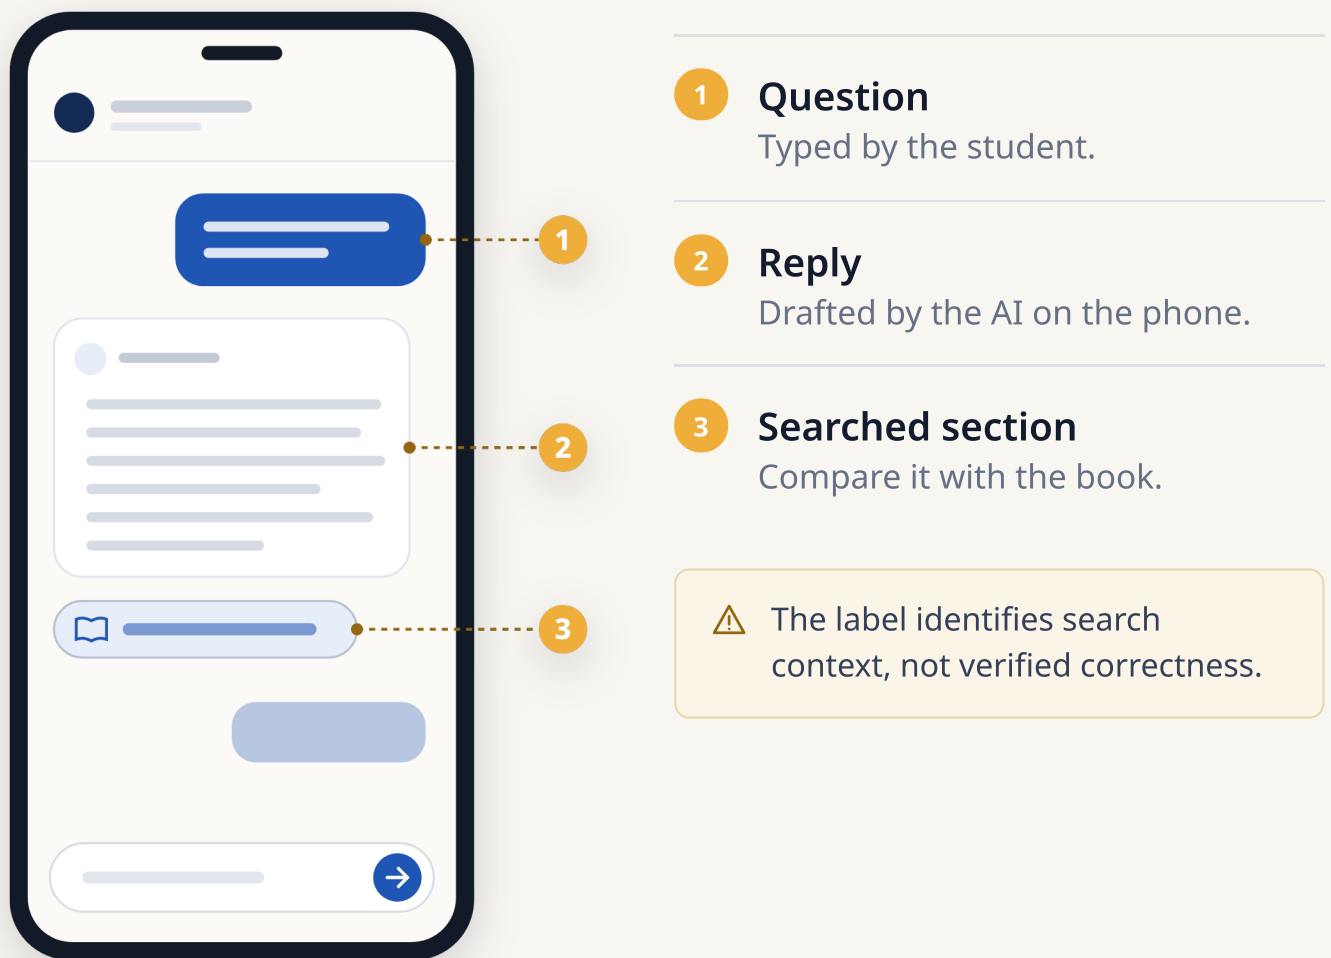

On-phone search + on-phone AI

## See which book section the app searched.

Type a question, read the reply and inspect the section label. This gives students and adults a useful place to check the context.

Keep the textbook nearby. Important facts and explanations should be checked with a reliable reference or teacher.

*Illustrative workflow*

# Three people decide whether VIDYA AI stays on the phone.

## The parent

Guardian of a Std 5–10 student

### PAIN

Can't help with every subject the moment it's needed.

### WANTS

Help from the actual textbook in a safe, contained tool.

### WORRIES

Wrong answers, distraction, data leaving the phone.

*"Help from your child's book, on a phone with no internet permission."*

Check book & phone →

## The student

Std 5–10, Maharashtra State Board

### PAIN

Stuck on a question with nobody free to ask.

### WANTS

A quick, clear explanation in English or Marathi.

### WORRIES

Another app that nags with points and streaks.

*"Type the question, see the answer and the book pages it came from."*

Try 3 real questions →

## The school sponsor

Principal, academic head or teacher-in-charge

### PAIN

Little after-school help; online tools hard to supervise.

### WANTS

Textbook alignment, privacy, low staff effort.

### WORRIES

Parent complaints, AI errors, setup load.

*"A small, supervised evaluation on your own books and phones."*

Plan an evaluation →

# What each feature does — and why it matters.

| FEATURE                                                                                                           | WHAT IT DOES                                 | WHY IT MATTERS                                       |
|-------------------------------------------------------------------------------------------------------------------|----------------------------------------------|------------------------------------------------------|
|  <b>Local book search</b>        | Searches the supported textbook on the phone | Answers start from the student's own book            |
|  <b>On-phone AI answer</b>       | Writes the reply on the device               | Works offline after setup; no data cost per question |
|  <b>Source label</b>             | Shows the book context it searched           | Easy to check the page before relying on it          |
|  <b>English &amp; Marathi</b>  | Answers in either; Hinglish typing accepted  | Easier to ask. Quality gaps; Hindi partial           |
|  <b>Ten study buddies</b>      | A choice of companion characters             | Friendlier to ask; no streaks or points              |
|  <b>Local chats</b>            | Stay on the phone and can be deleted         | The family keeps control of history                  |
|  <b>No internet permission</b> | The standard app cannot connect out          | A clear boundary parents can check                   |

# Why VIDYA AI: three differences you can check.

01

## Answers start from the textbook

It searches the supported State Board book on the phone before replying.

**WHY IT MATTERS** Help stays close to the class syllabus.

02

## Offline — the standard app has no internet permission

Search and answers run on the device after USB setup.

**WHY IT MATTERS** Works without data; parents can verify it in settings.

03

## It shows what it searched

Each answer carries a source label: where it looked, not proof it is right.

**WHY IT MATTERS** The student is pointed back to the page.

Also calm by design: no streaks, points or notifications, and local chats the family can delete.

# A six-step demo with the student's own book.

Supported Android phone, set up

Student's own supported book

## 01 PROBLEM

A Std 7 student is stuck on a science exercise; no adult is free.

**SHOW** The real exercise in the printed textbook.

## 02 INPUT

The student types the question in English or Marathi.

**SHOW** Typed only — no voice or camera input.

## 03 ACTION

VIDYA AI searches the book on the phone and writes an answer.

**SHOW** Aeroplane mode on: it still works.

## 04 RESULT

The answer shows a source label with the searched book context.

**SHOW** Open the textbook at that page and compare.

## 05 IMPACT

The chat stays on the phone and can be deleted.

**SHOW** Delete a chat in front of the parent.

## 06 NEXT STEP

Decide on a short trial: three real homework questions a day.

**SHOW** Run the book and phone checks first.

# Try it properly: a short trial with a clear yes/no.

## Family trial

|          |                                                               |
|----------|---------------------------------------------------------------|
| GOAL     | See if it helps this student with real homework.              |
| SETUP    | USB setup on the family's phone; supported books loaded.      |
| MEASURE  | Questions asked; useful answers; answers checked in the book. |
| DECISION | Keep, stop, or ask for different books.                       |

## School evaluation

|          |                                                                |
|----------|----------------------------------------------------------------|
| GOAL     | Test alignment, usability and setup effort with a small group. |
| SETUP    | Standard offline app on school or family phones.               |
| MEASURE  | Teacher spot-checks against the book; student feedback.        |
| DECISION | Stop, extend, or discuss next steps.                           |

## Book check

- ☐ Maharashtra Board, Std 5–10
- ☐ Exact title and medium on the supported list
- ☐ Answers needed in English or Marathi

All ticked → the book can be trialled.

## Phone check

- ☐ Android phone (no iPhone version)
- ☐ Phone model confirmed with us before setup
- ☐ About 1 GB free storage
- ☐ A computer and USB cable for setup

First chapter load: 42–80 s on the flagship test phone; cold start 2–3 min. Slower phones may take longer.

# What VIDYA AI can show today.

Internal test results, shown for transparency — not promises of performance.

**OFFLINE****AVAILABLE**

The standard app has no internet permission — checkable in Android settings.

**ON-DEVICE****AVAILABLE**

Book search and answer generation run on the phone.

**TESTING****AVAILABLE**

Internal unit tests: 228 offline / 327 connected.

**STABILITY****PARTIAL**

Release 1 recorded zero crashes in internal S26 testing.

**RECALL****PARTIAL**

Internal key-fact recall: 74.5% English, 58.3% Marathi — a test score, not an accuracy promise.

Not yet measured: real-student usage, learning outcomes or customer references. A trial gathers that on your own books.

# Three ways to start, each smaller than buying outright.

A proposed structure. Prices, limits and terms are still to be confirmed.

## ENTRY

### Family trial

Prove fit for one student.

#### FOR

One family, one student

#### INCLUDES

Standard offline app; supported books

#### SETUP

USB setup on one phone

#### NEXT STEP

Move to Family access

Pricing to be confirmed

Check book & phone →

## CORE

### Family access

Ongoing use at home.

#### FOR

Families whose trial worked

#### INCLUDES

Standard app; supported books

#### SETUP

USB setup

#### NEXT STEP

Siblings; additional books

Pricing to be confirmed

Get started →

## SCHOOL

### School evaluation

A small, supervised evaluation.

#### FOR

Schools testing with a small group

#### INCLUDES

Evaluation support; supported books

#### SETUP

USB setup, once per phone

#### NEXT STEP

More classes, standards, schools

Contact for school pricing

Plan an evaluation →

⚠ Not included: voice, camera, maths solver, parent dashboard or guaranteed marks.

# What you can trust, and how the AI is used.

## TRUST STATUS

### IN PLACE

Standard app has no internet permission (checkable in Android settings).

### IN PLACE

Chats stay on the phone and can be deleted.

### IN PLACE

Source label shows which book context was searched.

## LOW-RISK START

- Book and phone checked first — no match, no setup
- A trial before any ongoing access
- No promises of marks, accuracy or time saved
- Delete the app and chats at any time

## AI DISCLOSURE

### What the AI does

- Searches the supported book on the phone
- Answers in English or Marathi, with a source label

### What people do

- Student checks the answer against the book
- Parent or teacher stays the authority

### No guarantees

- Answers can be incomplete or wrong
- Marathi quality is lower than English

### Always verify

- The page the label points to
- Anything used for an exam answer

# Questions families and schools ask first.

## Does it need the internet?

No. The standard app has no internet permission. Setup is done by USB.

## Which books are supported?

Supported Maharashtra State Board books for Standards 5–10. Check your exact title before setup.

## Which phones work?

Android only (no iPhone), with about 1 GB free storage. Confirm your phone model before setup; first chapter loading can be slow.

## Which languages?

English and Marathi answers, with quality gaps. Hindi is partial. Hinglish typing is accepted.

## Can my child speak or photograph a question?

No. Questions are typed. There is no voice, camera or maths solver.

## Is the answer always right?

No. The source label shows what was searched, not that the answer is correct. Check the book.

## Will it improve marks?

We make no such claim. It is a starting point for textbook questions.

## What does it cost, and where do I get it?

Pricing is still to be confirmed. There is no public store listing; access is arranged directly.

# VIDYA AI on one page.

**PROBLEM**

Students get stuck on textbook questions when no adult, tutor or connection is around.

**PRODUCT**

An offline Android study companion: it searches the supported book on the phone and answers with a source label.

**FOR**

Maharashtra State Board students, Std 5–10, their parents and schools.

**DIFFERENT**

Book-first, local, no internet permission, calm by design — honest about AI limits.

**NEXT STEP**

Check your book and phone, then run a short trial on real homework.

**CHOOSE YOUR NEXT STEP · EVERY LEVEL IS  
A SMALLER COMMITMENT THAN THE NEXT**

**See how it works**

How it works page

**Check fit**
